TAVIT

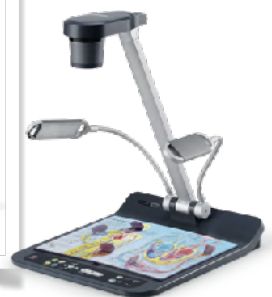

THE AUDIO VISUAL & INFORMATION TECHNOLOGY CO.

TAVIT (PTY) LTD, a Level One B-BBEE Enterprise, is a black woman owned South African Audiovisual, Information and Communications Technology (ICT) Company based in Gauteng. Established in 2015 to provide unique audiovisual solutions to the public and private sectors. TAVIT supplies, installs, integrates, commissions and maintains audiovisual equipment and meeting room technology such as displays, audio and video conferencing, delegate systems, digital recording and transcription technology solutions into conference venues, boardrooms, council chambers, parliaments, auditoriums and training facilities.

TAVIT also provides other hardware peripherals such as push-to-talk systems, cameras and tracking, interpretation equipment, electronic voting, presentation equipment and public address systems.

We have recently expanded our product range to include Video Walls, Document Cameras and a wider range of interactive display technologies suitable for the boardroom and classroom environment. We now also offer Digital Marketing and Social Media solutions to constantly grow your brand, your business and your bottom line.

Innovation is at the core of our business, our knowledge and expertise on Audiovisual and Information Technology trends, ensure that you can provide your users and collaborators with easy access to effectively connect and communicate through any digital device.

Our Vision is:

To be the most diverse, most innovative, and most current audiovisual and information technology company, solving the most complex problems with the simplest up-to-the-minute solutions. Delivering the highest quality product that will guarantee peace of mind.

Our Values:

- **Honesty and Integrity.**
- **Our People.**
- **Developing our KNOWLEDGE.**
- **Efficiency.**
- **Service.**
- **We value our Partnerships with our clients and our suppliers.**
- **We provide Quality product with sustainable outcomes.**

Our Solutions:

Parliament, Legislatures and Municipalities:

Parliament, Legislatures and Municipalities require high quality audiovisual systems for their discussion chambers. TAVIT provides modern, elegant, fully- customisable, flush-mount, wired and, wireless delegate systems for a wide variety of applications such as discussion, multiple language interpretation, electronic voting and fully-featured digital recording solutions.

Critical decisions are made in chambers regularly and accurate record keeping is a vital component in this environment. TAVIT has a state-of-the-art, software-based and hardware-based solutions customisable to any workflow. Digital recording (audio and video), transcription (Hansard), archiving, publishing, live streaming with relevant metadata. These solutions fully integrate with well-known conference hardware and effectively deal with multi-lingual and multi-room recordings.

The technology is fully scalable, user-friendly, modern, professional and flexible.

TAVIT's solution brings public participation outreach and engagement goals a lot closer by offering software based solutions that enable citizens' access to information, access to live meetings and video-on-demand, over any smart device.

Whether the intended audiences have Smartphones with an Android or iOS operating system, a PC, a SmartTV, a tablet, they can receive the debate in video or audio format, in any available language. Promoting open, participative, accessible, and transparent processes within the framework of public participation.

Our technologies allow the complete removal of barriers such as remoteness, to information sharing. The time is now for participatory forms of decision-making processes through access to information. The access to this data empowers communities in acquiring knowledge through an easy to use format such as video, through means used daily such as Facebook, Twitter, Instagram, YouTube, the Internet or any other preferred network.

Application:

- Digital Recording
- Meeting Content Archiving
- Editing
- Controlled Content Sharing
- Video-On-Demand
- Live Web Streaming
- In-house and Web Publishing
- Content Sharing over Social Media Platforms

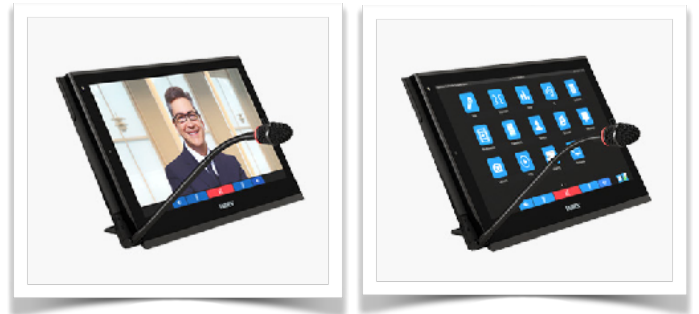

THE AUDIO VISUAL & INFORMATION TECHNOLOGY CO.

The meeting room, Boardroom and Auditorium:

The meeting room audiovisual requirements differ from one organisation to the next. Turn your meeting room into a highly productive and collaborative environment. TAVIT provide the following technologies:

- Display technologies such as projectors, interactive screens, LCD/ LED Monitors for presentation purposes.
- Audio systems such as delegate microphones, array microphones, boundary microphones, gooseneck microphones and button microphones.
- Video Conference Systems.
- Sound Systems.
- Digital Conference recording both audio and video.
- Collaboration systems.
- Meeting room management systems.
- Automation.

TAVIT
THE AUDIO VISUAL & INFORMATION TECHNOLOGY CO.

TAVIT
THE AUDIO VISUAL & INFORMATION TECHNOLOGY CO.

The Court room:

The Courtroom of today requires a fully Integrated Audio Visual Solution that enable the instantaneous delivery of information using the latest technologies, capturing verbatim transcripts which are available immediately and archiving the video recordings for streaming or web publishing purposes. We provide;

- Audio systems.
- Display technologies (Presentation systems).
- Interpretation Systems.
- Document camera's.
- Transcription recording technologies.
- Digital video recording (audio only option available).
- Live Streaming.
- Web publishing/ Video on Demand.
- Broadcast services.
- Archiving.
- In-House Publishing

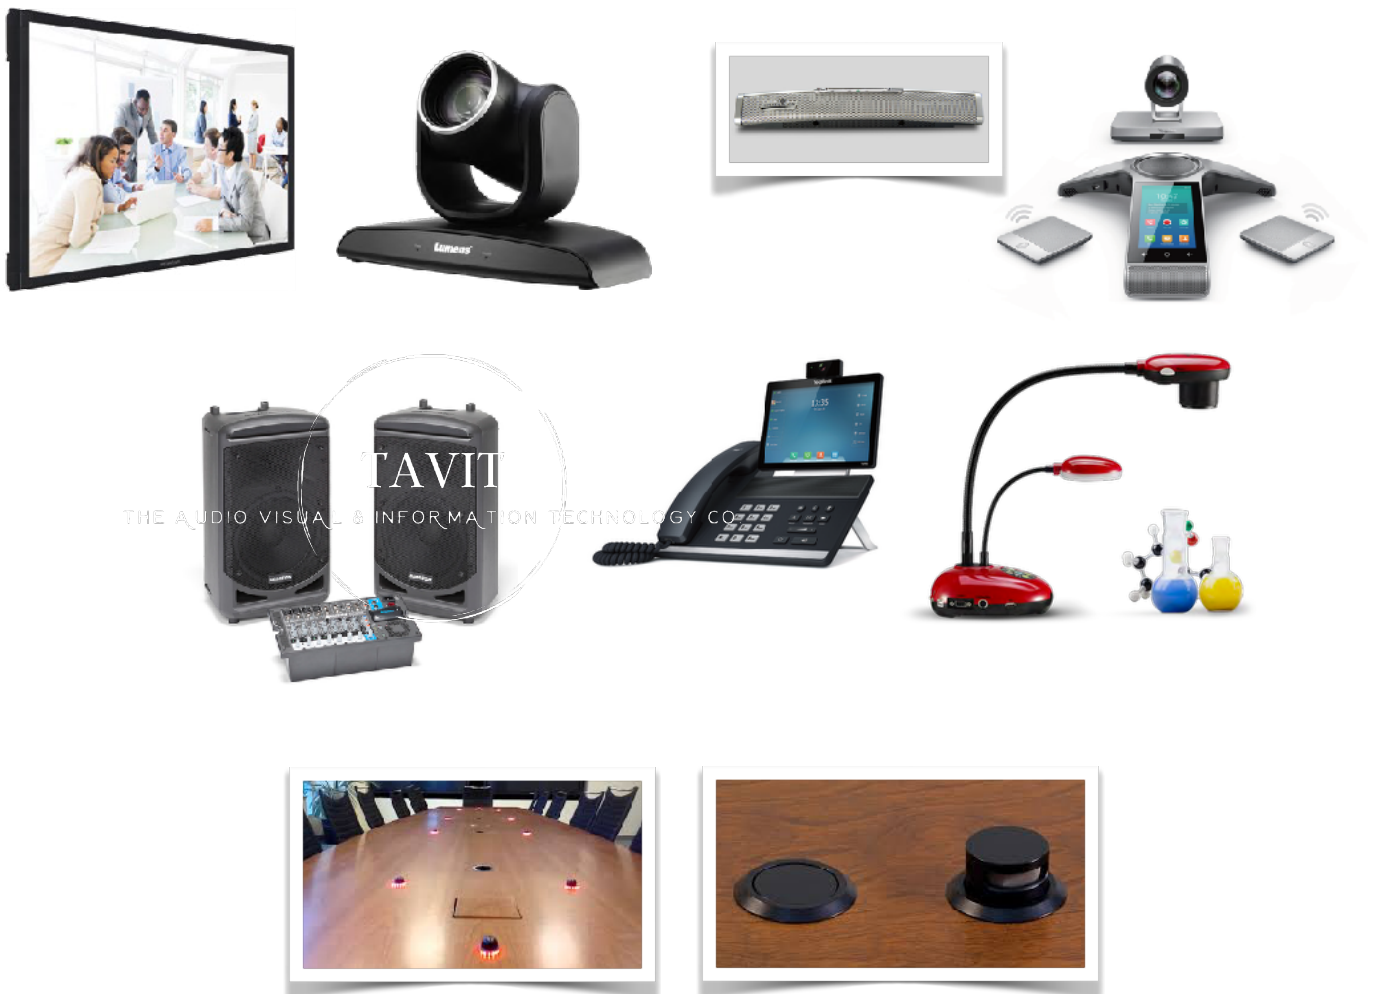

The Conference/ Summit/ Convention:

A meeting is an assembly of people to discuss and share common interests; meetings are used as information gathering processes, through verbal interaction to reach an agreement. TAVIT incorporates all necessary technologies required to make this possible. With a basic voice lift technology, push-to-talk systems and camera tracking systems, a delegate in the venue is able to see and clearly hear the speaker.

Technology now allow for automatic delegate registrations. The meeting can be easily managed with electronic voting and instant display of results. All automated and customised per requirement.

We ensure that the meeting is recorded for purposes of storage, archiving, editing, distribution, transcription or any other requirement. We provide the technology that gives you the capacity to reach wider audiences.

Have more collaborative meeting areas that are engaging, flexible and easy.

The Classroom, Lecture Hall and Training Room (Teaching and Training):

The use of technology in the classroom for teaching and learning, also known as e-learning, is fast becoming an integral part of education around the world. In 2015 the introduction of the digital classroom was introduced and piloted in the government education system in South Africa, implemented first in Gauteng. TAVIT offers paperless classroom solutions through Professional Audio Visual (Pro AV) and Information and Communication Technology (ICT) that can be used for teaching and learning.

These solutions include:

- Desktop and Personal Computer, Laptop or tablet.
- Document cameras / visualisers.
- Interactive Whiteboards and Large interactive LED/ LCD Panels with or without Multimedia pens/stylus'.
- Interactive projectors/ Digital projectors and screens.
- Microphones. Wired, Wireless, Podium and Desktop microphones/ Delegate systems.
- Ceiling and Wallmount Speakers.
- Digital Podiums.
- Digital recording (audio and video) of sessions for Archiving, Streaming, Video-On-Demand and Web publishing solutions.
- Control Systems.

These solutions promote engagement with students, allow teachers to better connect and administrators to increase efficiency. We supply easy and affordable solutions that compliment current classroom, lecture hall or training room set up.

Digital Signage Solutions:

Digital Signage is a sub-segment of electronic signage, specifically using LCD, LED and Projection Technologies to display digital content for private or public consumption. Digital signage enables organisations to accomplish several goals such as internal and public information sharing, advertising, enhanced customer service experience, announcement and general navigation. Digital content is displayed easily via digital signage software and hardware that is easy to use, program and edit flexibly.

TAVIT supplies Commercial/ Professional displays and digital signage solutions such as:

- LCD and LED Displays.
- Interactive Large Screen Computers.
- Video Walls.
- Kiosks.
- Display Control Software/ Digital Signage Players.
- Projection walls.
- Indoor and Outdoor LED screens.

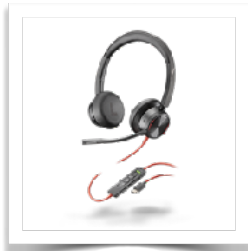

Remote Work Solutions - Post Pandemic:

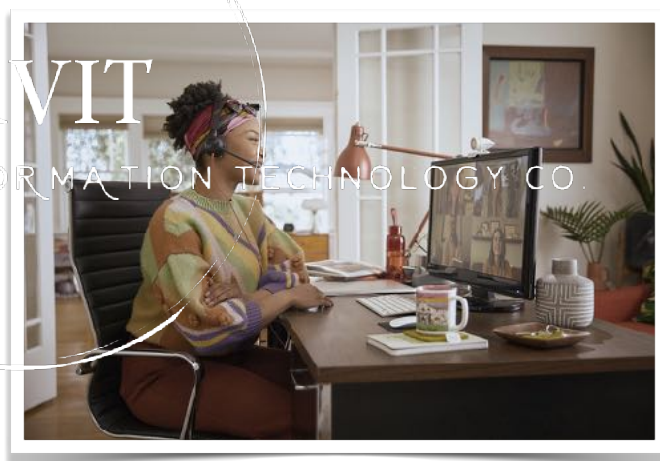

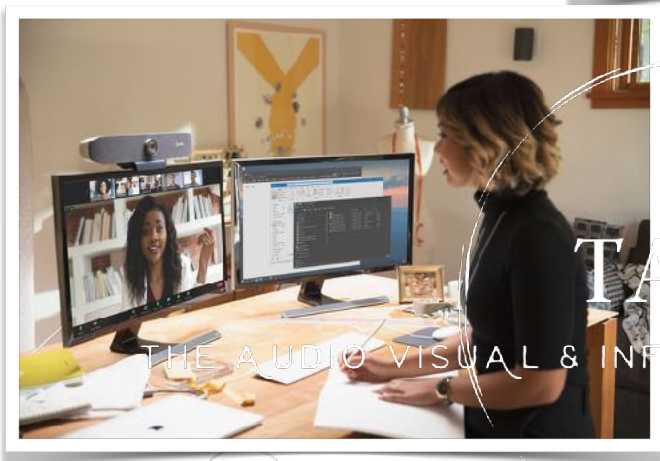

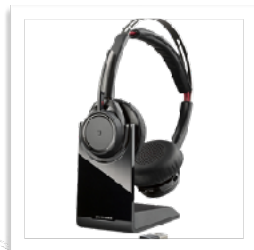

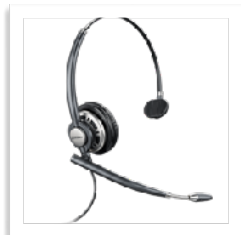

TAVIT now offers remote working solutions that fit perfectly into your organisations strategies and goals. The pandemic has disrupted the workplace since 2019, with millions of people rapidly adjusted to working from home when international lockdowns were implemented and public areas shut down, with only essential workers allowed to continue working from their regular places of work.

Our solutions allow you and your employees to be as productive as you were in the office space, whether working from their bedrooms, home office, on the road, while commuting, they will feel like they are all in the same room. These solutions can be deployed in the following spaces:

- Remote Work
- Conference Room
- Hybrid Working
- Office Work
- On-The-Go
- At-The-Desk
- Huddle Space
- Customer Service Centre

- Video Conferencing
- Phones and Speaker phones
- Headsets
- Cloud
- Services
- Management and Insight
- Private Video Conferencing
- UC Software
